

Neha Khan

SOFTWARE ENGINEER / FULL STACK DEVELOPER

03258991204

n.nehakhan333@gmail.com

<https://www.linkedin.com/in/neha-khann/>

Software Engineer with 4+ years of experience building enterprise-grade applications across banking and product-based environments. Strong foundation in Core Java and SQL-driven systems, with full-stack development experience using the MERN stack. Actively expanding into AI/ML engineering — hands-on with LLM fundamentals, fine-tuning (LoRA/QLoRA), and RAG-based application development — to bring AI-driven capabilities into full-stack engineering work. Experienced in system modernization and performance optimization, with a proven track record of shipping stable, production-ready systems.

SKILLS

- **Modern Backend:** Node.js, Express.js, Spring Boot (Working Knowledge), Quarkus (Exposure)
- **AI/ML:** LLM fundamentals (tokenization, transformer architecture, self-attention), Fine-tuning (SFT, instruction tuning, LoRA/QLoRA, quantization), Hugging Face Transformers, PyTorch, LangChain, FAISS/ChromaDB (vector DBs), Prompt Engineering
- **Frontend:** React.js, Redux, JavaScript, HTML, CSS, Bootstrap, Vue.js (Exposure), TypeScript (Exposure)
- **Enterprise Java:** Core Java, JSP, Struts, JSF
- **Databases:** Microsoft SQL Server, MySQL, MongoDB
- **Architecture & Concepts:** REST APIs, Microservices (Exposure), SDLC, Design Patterns
- **Tools & Technologies:** Git, SSMS, SQLyog, BIRT Reporting, Grafana, Docker (Basics), Puppeteer, Keycloak SSO

PROFESSIONAL EXPERIENCE

SIBISOFT

Oct 2024 - Nov 2025

Software Engineer 1

Accomplishments:

- Developed enterprise backend modules using Core Java and Spring Boot for business logic and database interactions.
- Built and maintained frontend components using JSP, Struts, JSF, PrimeFaces, and jQuery.
- Modernized legacy components by migrating selected Java modules to TypeScript, improving maintainability.
- Implemented JUnit testing to enhance application stability and reduce production issues.
- Optimized MySQL database queries and improved data retrieval performance.
- Supported Windows-to-Linux migration efforts, ensuring system compatibility and smoother deployments.

BANK AL HABIB LIMITED

Oct 2022 - Sept 2024

Software Engineer

Accomplishments:

- Developed and maintained enterprise backend services using Java and Quarkus to support core banking workflows.
- Contributed to migration from monolithic systems to microservices architecture, reducing deployment time by 50% and improving scalability.
- Built responsive frontend modules using Vue.js with REST API integration, improving operational processing efficiency by 40%.
- Designed and generated financial and operational reports using BIRT, streamlining reporting cycles.
- Optimized complex SQL queries and performed performance tuning in MS SQL Server, improving response times.
- Improved system reliability by applying clean architecture principles, reducing defect rates by 35%.
- Collaborated with cross-functional teams and communicated technical solutions to business stakeholders for smooth project delivery.

WOIT SOLUTIONS

May 2022 - Oct 2022

Full Stack Web Engineer

Accomplishments:

- Led a team of 5 developers to build a scalable React + Redux frontend architecture, improving page load performance by 40%.
- Developed and integrated RESTful APIs using Node.js with SQL and NoSQL databases.
- Built an automated chatbot for LinkedIn Sales Navigator using Puppeteer, increasing user engagement by 30%.
- Improved application usability by incorporating bi-weekly client feedback, increasing user satisfaction by 25%.

Bytecorp
Full Stack Developer

Feb 2022 - July 2022

Accomplishments:

- Reduced bug resolution time by 30% through structured debugging and code optimization.
- Contributed to the deployment of Autilent, enhancing real-time system monitoring capabilities by 50%.
- Improved system responsiveness by 45% using Jetson Nano, Grafana, RabbitMQ, and Python.
- Enhanced software-hardware integration efficiency by 20% through interface evaluation and testing.

EDUCATION **Aug 2018 - March 2022**

NED University of Engineering & Technology

Graduation in Software Engineering

3.876 CGPA

Rank in Top Ten : 7th out of 101

CERTIFICATES

- App Development Competition Powered by GOODCORE (December - 2021)
- Participation in Speed Programming Competition (July - 2022)
- Two Days Training on Data Modeling using AI and Power BI (November - 2023)
- Three Days Training on Quarkus with MicroProfile and Kubernetes (December - 2023)
- AI Tracking Hackathon (July - 2026)
